Qatar Bank launches card for domestic workers

The Qatar International Islamic Bank (QIIB) has launched a card for domestic workers, including Filipino household workers, for efficient and real-time banking services, and secured tracking of salaries from their employers.

The card, which is specifically designated for domestic workers whose salaries are lower than QR 5,000, allows a secure and certified record of transactions on the payment of the workers' monthly salaries in support to the Qatar Law on Domestic Workers.

In particular, the card will allow employers to directly transfer the workers' salary in real-time through the QIIB's digital platforms, such as mobile banking applications and internet banking.

Domestic workers can also use the card in all Automated Teller Machines (ATMs) and points of sale across Qatar for the payment of utility bills, online purchase, as well as in transferring money to their home country.###
